

Standard EPS Corner Protectors

Protect Your Products with our Standard High-Quality EPS Corner Protectors

Cellofoam understands protective packaging and the challenges associated with shipping. Our factory standard, high-quality, expanded polystyrene (EPS) foam corner protectors are an efficient and economical way to package products in boxes to help protect them in transit. Cellofoam offers four different sizes in stock and ready to ship. Each set of four corners is molded as a single part from which each corner easily snaps off. Our corners are commonly used for box-in-box repackaging.

Cellofoam standard high-quality EPS corner protectors are made of 1.25 pcf density premium expanded polystyrene rigid insulation. The EPS is composed of closed cells with excellent compressive and flexural strength that protects your package from shock and corner damage in shipment. In addition to these standard EPS corners, Cellofoam offers a wide variety of other packaging products including custom molded EPS and fabricated flexible foams.

SIZES

Cellofoam offers four different corner sizes in thicknesses of 0.75, 1.0, 1.25, and 1.5 inches that are in stock and ready to ship. Size dimensional details are shown in the table below. Example drawings for the 0.75 and 1.5-inch-thick corner protectors appear on the following page.

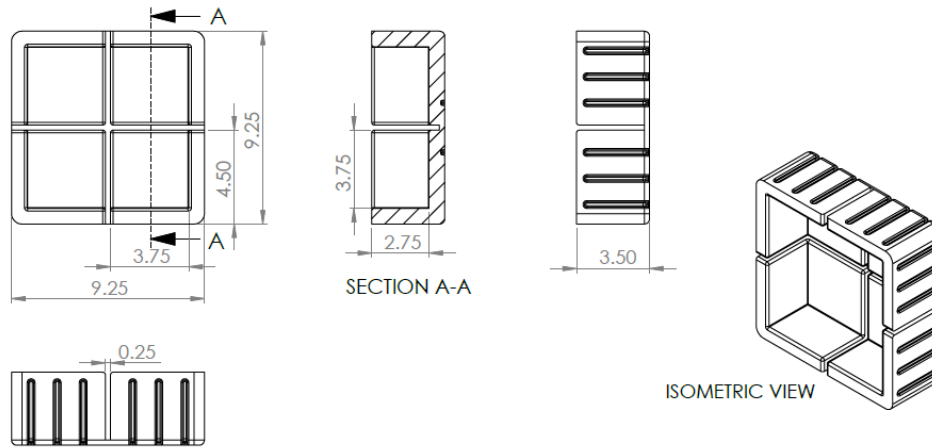

Cellofoam Standard EPS Corner Protectors						
Thickness (inch)	Outer Dimensions (inch)			Inner Dimensions (inch)		
	Length	Width	Depth	Length	Width	Depth
0.75	4.50	4.50	3.50	3.75	3.75	2.75
1.00	4.50	4.50	3.75	3.50	3.50	2.75
1.25	5.00	5.00	4.00	3.75	3.75	2.75
1.50	5.00	5.00	4.25	3.50	3.50	2.75

ADVANTAGES

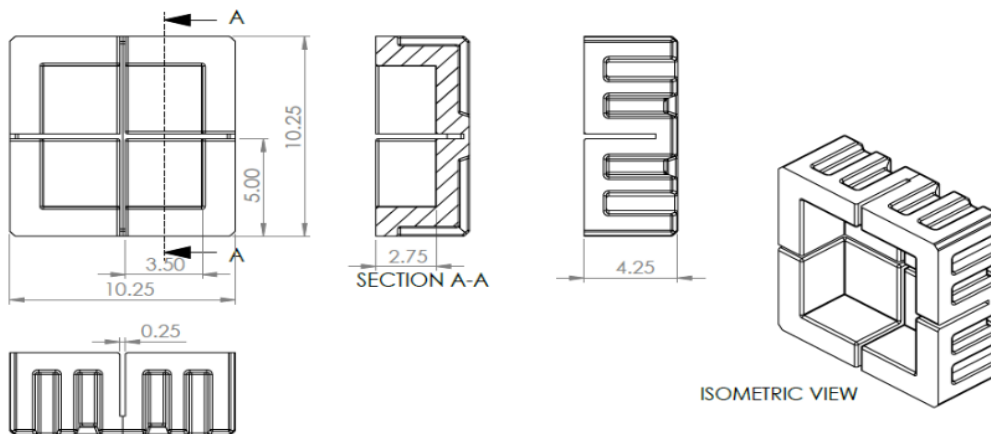

- **Protects against shock, impact, vibration, and corner damage during shipment**
- **Will not scratch or mar most delicate surfaces**
- **Cost Savings:** Cellofoam standard high-quality EPS corners are economical and an efficient way to protect your products and improve your profit. Using standard corners lowers costs compared to custom made packaging components.
- **Environmentally Friendly:** EPS is 100% recyclable and contains no formaldehyde or ozone-depleting CFCs or HCFCs.
