

## Rotationally molded, foam filled launch and retrieval docking system for Kayaks, Canoes and Paddleboards

- Mounts to any fixed or floating dock using easy-to-install hardware with quiet components for less noise in wave activity
- Grey granite color with a slip resistant surface
- Underwater crossbeams cradle vessel for added stability allowing passengers to easily & safely board and disembark
- Paddle through design allowing float on and float off from either end of launch
- Custom designed vertical posts and guide rails for paddle pull action
- Adjustable width between floats accommodates wider vessels
- Minimal footprint in the water
- Commercial or residential applications
